CHICAGO – It’s like living in a dream. Director Tim Burton’s adaptation of Lewis Carroll’s “Alice in Wonderland” uses 3-D magic for a timeless classic and creates gratitude for this current era of technology and creativity.

The Walt Disney Production features Alice (newcomer Mia Wasikowska), introduced as a special child. The daughter of a world explorer and dreamer, young Alice is afflicted with feverish visions about another realm that seems as real as the world around her. When she grows up – and after her father has died – she is set up through her station to marry the most genteel Lord in the region. Except she doesn’t love him.

Help is on the way in a form of a clock wielding White Rabbit. The creature is oddly familiar to the grown-up Alice, and dutifully she follows him down the rabbit hole. As she plunges, those childhood visions are about to become her new reality and most adventurous challenge.

Walt Disney’s “Alice in Wonderland” opens March 5th everywhere in Disney Digital 3-D, Real “D” 3-D and IMAX® 3-D. Check local listings for showtimes and 3-D availability. Features Johnny Depp, Anne Hathaway, Mia Wasikowska and Helena Bonham Carter, directed by Tim Burton. Rated “PG.”
