CHICAGO – “Wild Ocean 3-D” – an unforgettable nature documentary playing now in IMAX at Chicago’s Navy Pier – dives to the depths of the ocean and through the vastness of the sea with breathtaking 3-D cinematography and a profound message for all mankind.

From plankton to sardines, dolphins, seals, whales, sharks, gannets and man, Mother Nature’s greatest example of the food chain has been captured off the Wild Coast of South Africa and preserved on film in this educational documentary.

The film takes place along the spectacular South African coast where the Zulu and the Western worlds meet at Kwazulu Natal, which is where tropical meets the sea on the Wild Coast.
