DJ command center

for Dolby Atmos sound system.

CHICAGO – The latest sound innovation will make its U.S. debut right here in Chicago as the immersive, multi-dimensional sonic aura of Dolby Atmos will premiere at the iconic dance club Sound-Bar on July 29th, 2017. The club presentation will spin starting at 10pm with “Solarstone” from producer, composer and DJ Richard Mowatt. The audio system boasts no compression, 30 speakers and 22 channels of separation. Paired with Sound-bar’s legendary light show, the installation is one of the most inventive sound happenings to date.

Sound-bar is Chicago’s hottest upscale nightclub that revolutionizes Chicago nightlife by boasting style, luxury and state-of- the-art technology. Showcasing 20,000 square feet of pure bliss and two floors with three distinct rooms, Sound-Bar’s main room comes complete with a 4 by 20 foot 3.5mm pitch LED wall, high powered RGB laser lights and brand new state-of-the-art Martin intelligent lighting rig (which features 28 new moving lights).

HollywoodChicago.com got a preview of this amazing experience on Friday, July 28th, and captured the following slideshow.
